

WHERE IS MY CLASS?

Door Sign

Editable!

**TWO TYPES to Choose From
&
An EDITABLE version
NOW INCLUDED**

Directions

Print on cardstock and laminate the two printables in color. Cut the 6 Area Tiles out individually. Use Velcro to attach the Area Tile to the door sign when your class leaves. I have a student who has this as their weekly job. They love participating. It also helps students who have trouble transitioning as well as letting parents or staff know where your class is at when they need to find you. I Velcro all six to the back of the sign so students can easily pull from the back and place the tile on the front. If you are somewhere that is not listed on the tile, use a dry erase marker to write where you are at on the yellow area.

EDITABLE NOW – Just download the PowerPoint, find the text boxes where it says EDIT, and you can write anything. Take a real photo of your different areas you could be at to add the image to the light blue area. PERSONALIZE IT! 😊
