THEMED DAY

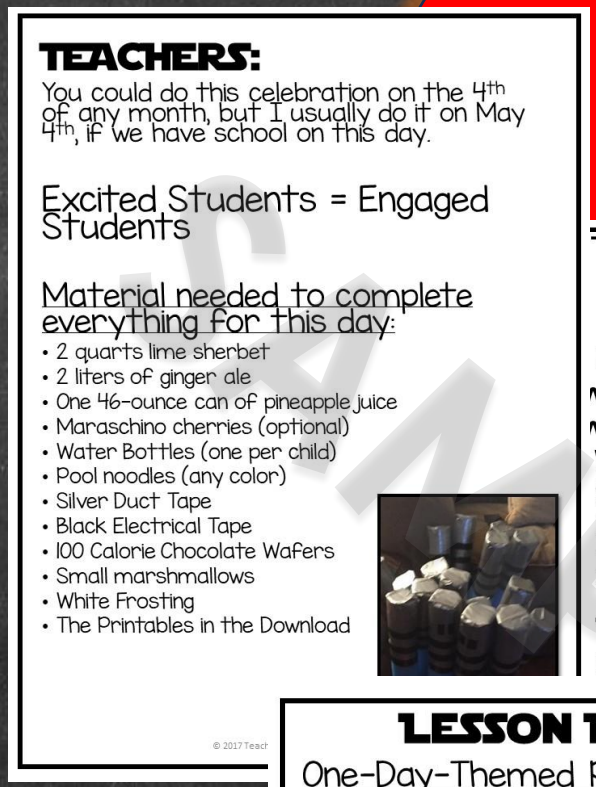

MAY THE 4TH BE WITH YOU!

© 2017 Teacher's Brain. All Rights Reserved

Includes:

- 25 Pages
- Home Project
- Create a Space Creature
- 4 Posters
- 7 Activities

TEACHERS:

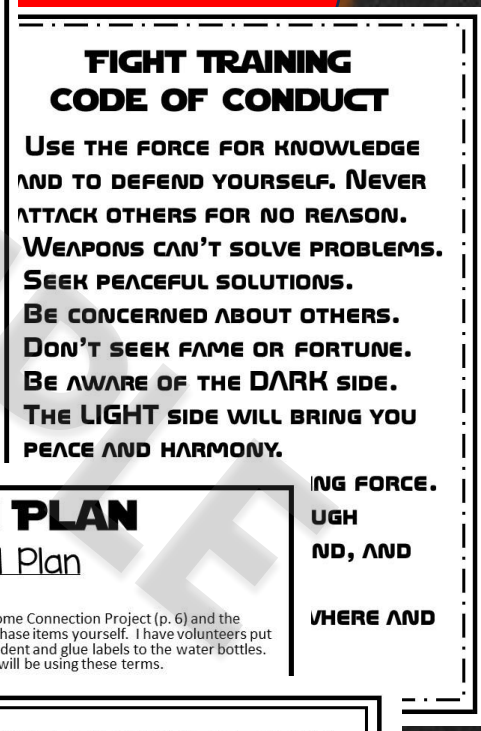

You could do this celebration on the 4th of any month, but I usually do it on May 4th, if we have school on this day.

Excited Students = Engaged Students

Material needed to complete everything for this day:

- 2 quarts lime sherbet
- 2 liters of ginger ale
- One 46-ounce can of pineapple juice
- Maraschino cherries (optional)
- Water Bottles (one per child)
- Pool noodles (any color)
- Silver Duct Tape
- Black Electrical Tape
- 100 Calorie Chocolate Wafers
- Small marshmallows
- White Frosting
- The Printables in the Download

FIGHT TRAINING CODE OF CONDUCT

USE THE FORCE FOR KNOWLEDGE AND TO DEFEND YOURSELF. NEVER ATTACK OTHERS FOR NO REASON.
WEAPONS CAN'T SOLVE PROBLEMS.
SEEK PEACEFUL SOLUTIONS.
BE CONCERNED ABOUT OTHERS.
DON'T SEEK FAME OR FORTUNE.
BE AWARE OF THE DARK SIDE.
THE LIGHT SIDE WILL BRING YOU PEACE AND HARMONY.

ING FORCE.

LESSON PLAN

One-Day-Themed Plan

Before the celebration, send home the Home Connection Project (p. 6) and the Donations Page, if you don't want to purchase items yourself. I have volunteers put the "training lasers" together for each student and glue labels to the water bottles. Place the posters up and explain how we will be using these terms.

HOME CONNECTION

Dear Parents,

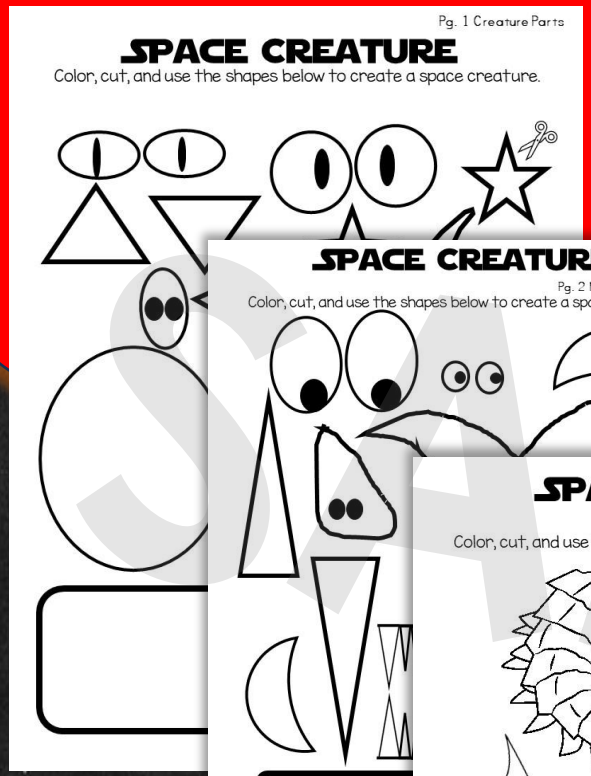

To go along with our Force and Motion Science Unit and May the 4th Be with YOU themed day, I'm asking your child to create a simple spacecraft that they can share with the class that will show some kind of force and motion. Please assist your child in his/her creations but try to let your child do the bulk of the work and creative design. This is a great opportunity for some awesome bonding time! Use any materials to create the craft. Recycled materials help students be creative and aware of recycling.

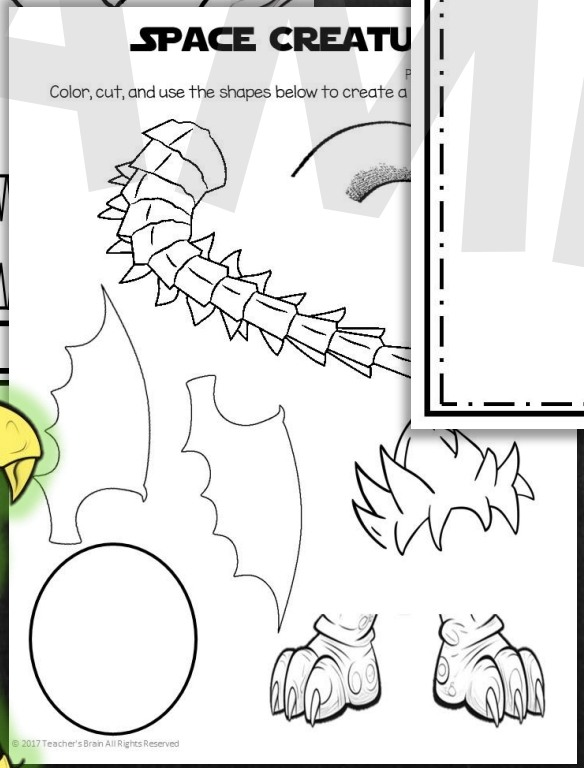

Here are some material ideas:

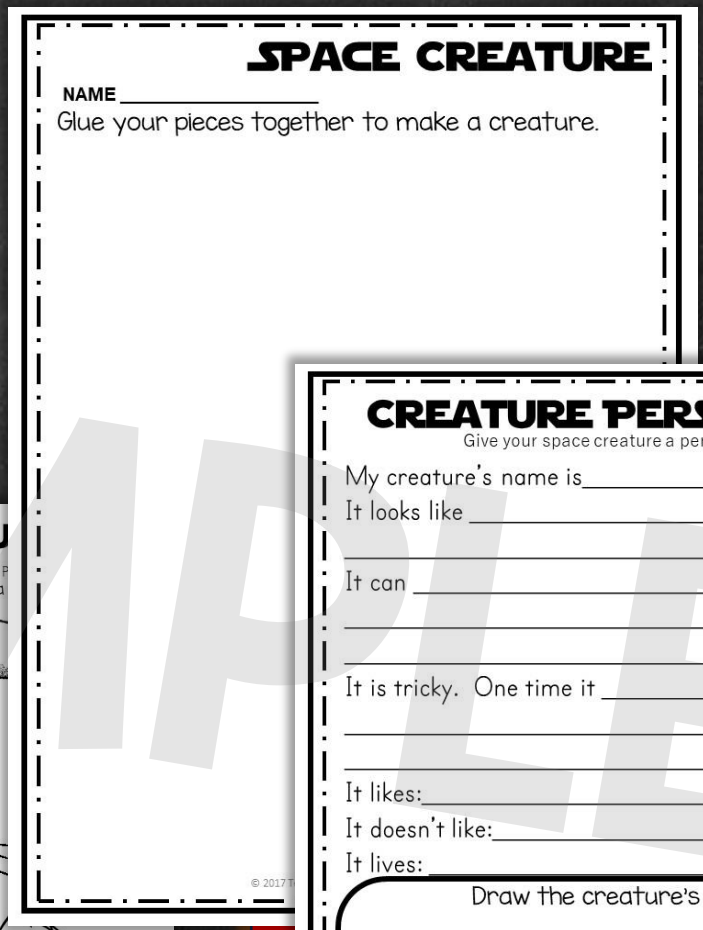

Paper towel tubes
Paper (They can make a paper airplane)
Plastic cups
Milk Jugs
Paper Plates (These make great space saucers.)
Legos

SAMPLE

BUILD A SPACE CREATURE

SAMPLE

TRAINING

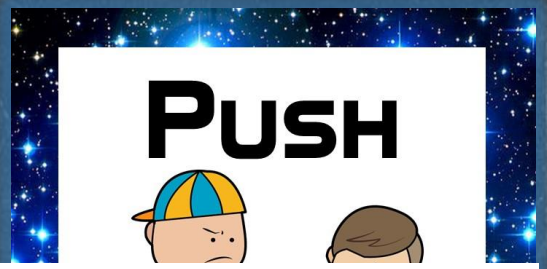

How to make your training tool...

1. Cut any color of a pool noodle in half with a knife. (Adults Only)
2. Cover about ¼ of the noodle by wrapping silver or gray duct tape around the bottom of the noodle.
3. Using black electrical tape, wrap three rings (or stripes) around the top of the duct tape. (You can use permanent marker, if you don't have the tape.)
4. Take two pieces of black tape and stick them vertically at the bottom of the noodle to look like buttons.
